

## APX Announces New Partners

July 21, 2010

In the evolving formation of a new global carbon economy, APX Environmental Markets is pleased to announce our new partners. Partnering with these firms will provide more robust management of carbon initiatives, from project development to asset and liability matching. APX will seek to combine the [APX Environmental Management Account](#)<sup>™</sup> with solutions developed by these partners.

### CARBON DISCLOSURE PROJECT

The **Carbon Disclosure Project** (CDP) is an independent not-for-profit organization holding the largest database of corporate climate change information in the world. Some 2,500 organizations across the world's largest economies now measure and disclose their greenhouse gas emissions and climate change strategies through CDP, in order to set reduction targets and make performance improvements. APX has teamed up with CDP to access its primary database of carbon emissions to develop a product and service offering regarding corporate greenhouse gas emissions data and asset management platforms. Visit [www.cdproject.net](http://www.cdproject.net) for more details on CDP.

### carbonflow

Connecting the carbon world

**Carbonflow** and its services are an integral part of creating a complete and transparent workflow of carbon project development. Their technologies are accessible across the globe by all parties involved with project implementation. The [Connect+](#) software service increases efficiency, transparency, and timeliness of project execution and management. Partnered with APX Project Track<sup>™</sup>, Connect+ users will be able to effectively market their projects to both compliance and voluntary buyers around the world.

### IEA webCO<sub>2</sub><sup>+</sup>

**IEA** operates as a true teaming partner with clients, providing Software as a Service applications to manage Environmental, Health, and Safety compliance activities. The [webCO<sub>2</sub><sup>+</sup>](#) application supports all carbon equivalent calculation and reporting protocols including the new EPA Part 98 reporting and The Climate Registry. IEA is a trusted partner providing integral liability data for a complete emissions balance sheet. Combined with the introduction of APX Report<sup>™</sup>, APX will provide total asset valuation and transact tools for emissions portfolio management.
