Abound Solar Partners with DW Europe in Solar Distributorship Contract

[Abound Solar](#), Inc., a leading manufacturer of cadmium telluride thin-film photovoltaic solar modules, announced a partnership and distributorship with [DW Europe](#), a leading commercial solar and BIPV (Building Integrated Photovoltaics) system integrator in [Italy](#). The companies will work together to install solutions based on Abound Solar's next-generation thin-film modules on commercially scaled projects.

Abound Solar, based in Colorado, United States, recently closed a \$400 million loan guarantee from the U.S. Department of Energy (DOE) to fund the expansion of the company's manufacturing capacity that will soon be the largest manufacturing facility in the U.S. This ramp in capacity will help cater to the demand for its solar products in Italy, [Germany](#), India and North America, and spur new growth in employment.

"At DW Europe, we choose to distribute modules that are not only beautiful but provide the end user with a high performance, low-cost module, which is why Abound Solar is such an attractive partner," said Enrico Tonduti, CEO of DW Europe.

"We are extremely excited to work with DW Europe, as one of our preferred system integrators," said Julian Hawkins, senior vice president of sales and marketing for Abound Solar. "The company's position as a leader in the Italian solar market represents a great opportunity for Abound Solar as we work to expand in the Mediterranean market."

About Abound Solar, Inc.

Abound Solar is a leading manufacturer of next-generation, cadmium telluride thin-film photovoltaic modules. Built upon 15 years of development at Colorado State University and with support from the National Renewable Energy Laboratory, Abound Solar is producing solar modules that significantly reduce the cost of generating solar electricity using a robust, commercial-scale, continuous manufacturing process. For more information, visit <http://www.abound.com>.

About DW Europe

DW Europe S.r.l. has been active in the energy sector since 2003, with its Green Energy Division responsible for the development of innovative renewable energy technologies. The Rome-based company is the leading Italian distributor of thin-film modules, which deliver the best combination of energy efficiency and design. DW Europe focuses on BIPV solutions (Building Integrated Photovoltaics), which in addition to producing energy are building elements at the same time. These solutions serve people's need for energy, while respecting the environment. DW Europe supports clients in achieving the best cost-performance ratio for their photovoltaic projects, suggesting system solutions with the best financial incentive and supporting installers for prompt and efficient after-sales service. For more information, visit: <http://www.dw-europe.com>.
