## **Abound strikes agreement with 5N Plus**

By Staff

LOVELAND - Abound Solar Inc. entered into an agreement with Montreal-based 5N Plus Inc. (TSX:VNP) for recycling and materials supply.

5N Plus will recycle Abound's solar modules and manufacturing scrap, turning it into recyclable glass and raw chemicals. Abound also signed a memorandum of understanding to purchase 5N Plus' semiconductor compounds for use in its solar module manufacturing.

"Abound Solar modules are produced using the most environmentally-friendly production process in the industry. This extension of our relationship with 5N Plus will ensure that at end-of-life, our modules will be recycled in the most sustainable manner and secure a long-term supply for our raw materials," said Abound Solar President and CEO Tom Tiller, in a prepared statement.

"5N Plus is a leading producer of semiconductor materials; their expertise will maximize recycling yields and create a true cradle-to-cradle solution for the materials used in our product," Tiller said.

The agreement will lead to further investment in 5N Plus' new facility in Wisconsin. In morning trading, 5N Plus' stock was trading up 3 cents at \$5.45.
