Aemitis Chairman and CEO to Speak at Advanced Biofuels Leadership Conference in San Francisco

CUPERTINO, Calif. – October 7, 2013 – Aemitis, Inc. (OTCQB: AMTX), an advanced fuels and renewable chemical company, announced today that Eric McAfee, chairman and chief executive officer of Aemitis, will speak at the Advanced Biofuels Leadership Conference in San Francisco on Friday, October 11th, at the Intercontinental Hotel. His remarks will begin at 8:30AM Pacific time.

The title of Mr. McAfee’s presentation is “Advanced Biofuels Produced by Conversion of a Corn Ethanol Facility.” The topic will examine the impacts and implications of governmental policies and programs on this type of plant upgrade including EPA and CARB (California) advanced biofuels policies; USDA and DOE financing programs and RIN pricing impacts on advanced biofuels.

The Advanced Biofuels Leadership Conference Series is one of the largest gatherings of advanced biofuels, renewable chemicals and biomaterials operating company CEOs and senior executives, strategic partners, analysts, policymakers and industry suppliers in North America.

About Aemitis

Headquartered in Cupertino, California, Aemitis is an advanced fuels and renewable chemicals company. Aemitis owns and operates a 60 million gallon renewable fuels plant in California; and built, owns and operates a 50 million gallon capacity renewable chemicals and advanced fuels production facility on the east coast of India. Aemitis operates a research and development laboratory at the Maryland Biotech Center, and holds five granted patents on its Z-microbe and related technology for the production of renewable fuels and biochemicals.
