October 19, 2010, 11:00 am - 1:00 pm
Denver Marriott City Center

About the Event

The Colorado Cleantech Industry Association is pleased to announce the inaugural **Colorado Cleantech Awards Celebration**. This celebratory luncheon will honor the companies and entrepreneurs driving Colorado's thriving cleantech industry.

About the Luncheon

CCIA's luncheon is the one event this year where Colorado's cleantech community will come together to honor the creativity and dedication to our new energy economy put forth by entrepreneurs, educators, corporate innovators, volunteers and policymakers. Don't miss this chance to network with Colorado's cleantech leaders!

Luncheon Keynote

Mr. Ira Ehrenpreis, General Partner with [Technology Partners](#) in Palo Alto, CA, will keynote the luncheon event. Ira has been with Technology Partners since 1996 and was investing in cleantech before it was considered as an industry. The majority of the firm's investments are in early stage companies and 50% of those are in cleantech. Ira leads the firm's Cleantech investment practice, investing in Energy Technology, Water Technology, and Advanced Materials opportunities and is an investor in Colorado's Abound Solar, as well as in Tesla Motors.

Widely regarded as one of the most experienced cleantech investors, Mr. Ehrenpreis will deliver a keynote address covering "**The State of the Cleantech Industry**." As one of the pioneers in the cleantech sector, he'll share how the cleantech sector has evolved over the past decade and review the drivers behind cleantech's emergence as the fastest growing area of the venture asset class. Mr. Ehrenpreis will also review the challenges the industry faces and those issues notwithstanding, why he believes cleantech will continue to be a good bet in the years and decades to come.

Awards Presentation

Awards will be presented in multiple categories. We encourage you to nominate yourself, your company, colleagues, clients - anyone that you think has made a difference in Colorado's cleantech community.
